- Smart Cards / RFID / Biometric Based Solutions
- Development of Websites / Portals (Expertise in WordPress, Joomla, Magento, Drupal)
- Project ManagementConsulting
- Internet of Things (IoT) Applications
- Salesforce CRM Consulting
- Artificial Intelligence

VoyMate is a latest addition to Opiant's innovational group of digital solutions.

The APP features an enhanced, visitor-friendly interface and delivers audio tour guide content. With its ability to work offline.

VoyMate is an ideal audio guide for the city sight seeing and other public venues where reliability, flexibility and ease-of-use are what you need.

A user can get free but limited online content to transform even the simplest visitor tour into a memorable outing. However, with its paid content VoyMate can store locally on the device hours of audio tourist guides, multimedia content and images.

Experts at the backend take care of Creating, delivering and updating content on the cloud.

Service Benefits

- Enhance your experience as a tourist anywhere by using the audio travel guide.
- The guide provides themed audio tours like focus on heritage walks, night sights, food trips, city architecture trips, local shopping trips and many more.
- This audio travel guide is also a great aid for the visually impaired visitors.
- The audio guides are broken down thematically into small sections. Depending on tastes individual guides can be downloaded on local device to avoid data connectivity charges
- It allows you to also book tickets for the tour buses
- For overseas traveler, it gives a quick conversion for forex too!
- Features keep adding and seamlessly upgraded in the application.

User benefits

- Professional content of various tourist spots across Delhi NCR - photographs, description, videos
- Voice over feature available for the description.
- 3D Videography and a few candid shots of the place.
- More than 10 languages support other than English.
- Offline availability – Easy to download and view later thus no roaming fees.
- Auto track location and suggesting places nearby.
- Social Integration available with Facebook, Twitter, Instagram and Whatsapp.
- Categorization of the tourist places and enabling the filters.
- Create diaries of the places visited and contribute as a traveler.
- Available for both iOS and Android platform.
